What Are Opioids?

Opioids are drugs which affect brain and basic bodily functions, such as breathing and digestion. Opioids are found in some pain and other prescription medications and in some illegal substances of abuse (e.g., heroin).

Opioid medications are used for treating pain, cough, and addiction.

Common Opioid Medications

This list is not all inclusive.

- Codeine (Tylenol with Codeine No. 3)
- Fentanyl (Duragesic)
- Hydrocodone (Vicodin, Norco, Lortab)
- Hydromorphone (Dilaudid)
- Methadone
- Morphine (MS Contin, Kadian)
- Oxycodone (OxyContin, Percocet, Roxicodone)
- Oxymorphone (Opana)

OPIOID SAFETY

A Quick Reference Guide
## Opioid Harms

- Taking too much opioids can make a person pass out, stop breathing and die.
- Opioids can be habit-forming and abused.
- Tolerance to opioids can develop with daily use. This means that one will need larger doses to get the same effect.
- If a person stops taking opioids, he/she will lose tolerance. This means that a dose one takes when tolerant could cause overdose if it is taken again after being off of opioids.
- An opioid dose a person takes could cause overdose if shared with others. Others may not be tolerant.

## Opioid DO’S and DON’TS

**DO** take opioid and non-opioid medications as prescribed

**DO** inform all providers that you are using opioids
- Tell your primary provider if another provider prescribes an opioid for you

**DO** be cautious about driving or operating machinery
- Never drive or operate machinery if you feel sleepy/confused

**DO** try to remain under the care of one primary provider

**DO** get help from family and friends
- Tell them that you use opioids
- Ask them to help you use opioids safely
- Tell them where you keep the naloxone kit and how to use it

**DON’T** take extra doses of opioids
- You could overdose and die

**DON’T** drink alcohol or take “street” drugs when using opioids; they can impair your ability to use opioids safely cause severe harm or death

**DON’T** share, give away, or sell your opioids
- This is dangerous and illegal

**DON’T** stop taking opioids on your own
- You may have flu-like withdrawal symptoms
- Your provider can help you stop safely
- You may overdose if you start using opioids again after an opioid-free break
